Terrace Gladioli Gardens

FRED W. UECK, Proprietor

Growers of Fine Gladioli

STEVENSVILLE, MICHIGAN

--♦--

Dear Friends:

We are not issuing our regular descriptive lists of all varieties this year. Last seasons sales so nearly exhausted our supply of bulbs, that stocks of many varieties is to low to list, so we decided on this economy list, which permits lowering of bulb prices to our customers.

For more detailed descriptions, refer to our last years catalogue, or if you have misplaced your copy, ask for one and we will enclose it in your order.

Size of Bulbs. Large 1½ inches in diameter and larger. Medium ¾ to 1¼ inches in diameter.

In making up your order, please give the sizes and prices, this helps us in filling your order and prevents errors.

Please Note! A variety listed as 8c each; 3 for 18c; 10 for 50c Is for ONE VARIETY. Do not order, 3 or 10 different varieties at the 3 or 10 rate price.

Bulbs will be shipped postpaid in United States, if your order totals \$2.00 or more. Due to increased packaging and mailing cost, please do not send orders for less than \$2.00. Thank You.

the first time in the history of the world, the whole of the human race has been gathered together in one place, and that is the city of Rome.

Now, if you will look at the map of Italy, you will see that Rome is situated in the middle of the country, and that it is surrounded by mountains on all sides. This makes it a very difficult place to attack, because any army that comes from the north or the south must pass through these mountains, and they will be easily stopped by the Romans.

But even though Rome is well protected, it is still a very dangerous place to live in. There are many people who want to harm the Romans, and there are also many people who want to help them. So, it is important for the Romans to be careful and to be prepared for anything that might happen.

One of the most important things that the Romans do is to keep their city clean. They have a special system for getting rid of waste, and they also have a system for getting rid of water. This is very important because it helps to prevent diseases from spreading.

Another thing that the Romans do is to build roads. They have built many roads that connect different parts of their empire, and these roads are very important for trade and for communication.

Finally, the Romans are known for their engineering skills. They have built many great structures, such as aqueducts, bridges, and temples. These structures are still standing today, and they are a testament to the skill and hard work of the Roman people.
